Github: [github.com/1999AZZAR](https://github.com/1999AZZAR)

## Summary

---

Highly skilled Python Programmer with over 3 years of experience specializing in microcontroller development and automation solutions. Adept at designing and building innovative applications to streamline processes and achieve project goals. Experienced in teaching Arduino and Python programming, fostering a passion for technology in others.

## Experience

---

### *Freelancer (Oct 2018 - Present)*

- Leveraged Python expertise to automate tasks and develop efficient applications.
- Designed and built innovative microcontroller projects for various purposes.

---

### *Trainer, Indobot Academy (Jan 2022 - jun 2023)*

- Delivered engaging workshops on Arduino and Python programming for microcontroller applications.
- Monitored student progress and prepared curriculum for future sessions.

---

### *Photographer, Lembaran Kasih (Sep 2020 - Sep 2021)*

- Captured high-quality images for print and digital projects, utilizing digital editing techniques to enhance the final product.

## Skills

---

Adept in various programming languages and development environments, including Python (expert), Arduino, C/C++/C#, HTML/CSS/JS. Proficient in Microsoft Office Suite and Canva.

## Language

---

- Indonesian (Native)
- English (Conversational)

## Summary

---

Highly skilled Programmer with over 3 years of experience specializing in Python and microcontroller development. Proven ability to automate tasks, create innovative applications, and leverage technology to achieve project goals. Adept in various programming languages and development environments.

## Skills

---

- Programming Languages: Python (expert), C, C++, C#, Arduino
- Web Development: HTML, CSS, JavaScript (UI/UX)
- Other: Microsoft Office Suite, Canva

## Language

---

- Indonesian (Native)
- English (Conversational)
- Javanese (Conversational)
- Arabic (Basic)

## Education

---

- MA Al-Ishlah Sendangagung (2015-2018) | Language, Science, and Religion
- SMP Muhammadiyah 12 - Sendangagung (2012-2015) | General Education

## Experience

---

### *Freelancer | October 2018 - Present*

- Utilized Python to automate tasks and develop efficient solutions (think: time saved and happy clients!).
- Designed and built innovative microcontroller applications for diverse purposes (check out my Github for a glimpse!).
- Increased production of products/services by exceeding established targets (efficiency is my middle name!).
- Collaborated with marketing teams to define project objectives, timelines, and milestones (teamwork makes the dream work!).
- Developed and maintained web functionalities using HTML, CSS, and JavaScript (full-stack skills at your service!).
- Managed project lifecycles, from concept to implementation (I see it through, from start to finish!).

---

## Curriculum Vitae

## Experience

---

### ***Trainer | Indobot Academy | January 2022 - Juni 2023***

- Delivered engaging workshops on Arduino and Python programming for microcontroller applications.
  - Monitored student progress and prepared curriculum for future sessions.
- 

### ***Student Ambassador | Cicil.co.id | January 2020 - April 2021***

- Streamlined registration processes, offered technical support, and managed paperwork.
  - Communicated directly with clients regarding administrative matters.
- 

### ***Photographer | Lembaran Kasih | September 2020 - September 2021***

- Captured high-quality images for various print and digital projects.
- Enhanced photographs through digital editing techniques.
- Optimized final product through subject positioning, lighting adjustments, and creative camerawork.
